

It's easy.
It's codeless.
It's automated.

With BryteFlow
you can access
data in real-time.

Vocus reduced data deployment time by 75% with BryteFlow.

By leveraging the considerable knowledge base and experience of the Bryte team, we have achieved in 3 months what we didn't believe we would achieve within the first year of our existence within Vocus Group.

Hamish Morgan,
General Manager – Analytics
Vocus Communications

**Siloed data locked up in legacy databases?
Data that won't play nice with data from other sources?**

BryteFlow can fix that for you. BryteFlow builds highly evolved Data Lakes on AWS / Azure that function as efficient analytical environments.

It ingests and prepares data from diverse sources like SAP, Oracle, Salesforce and SQL Server in real-time so you can access your data almost immediately.

BryteFlow is entirely self-serve and automated, with an easy point-and-click interface so any business user can start using it from day one.

Codeless
and Automated

DATA DATA DATA
DATA DATA DATA
DATA DATA

ANYONE CAN USE IT

BryteFlow means you don't have to hire expensive tech resources for data deployment. Any business user can use the intuitive point-and-click interface with ease.

GET DATA IN REAL-TIME

BryteFlow is really fast. It ingests and prepares data from multiple sources in real-time. For e.g. BryteFlow ingested and prepared data for a client in 2 hours where their earlier system took 4 days.

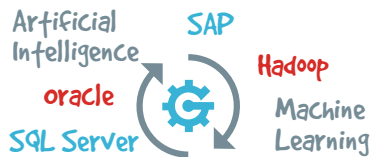

HIGH CONCURRENCY

With BryteFlow you can have multiple users and multiple applications access data and run queries at the same time without any slowing of the source system.

DATA YOU CAN TRUST

BryteFlow alerts you in case data is missing. It constantly verifies and reconciles data as it replicates so you are always assured of high quality, trustworthy data.

SEAMLESS INTEGRATION

You get seamless integrations between multiple compute platforms including Relational DW, Hadoop, Machine Learning and AI functionality. It also unlocks siloed data on SAP with ease, something most data ingestion software have a problem with.

FLEXIBILITY BUILT IN

With a BryteFlow powered Data Lake you are not tied to a particular solution, you get to choose whether your workloads are run on Hadoop, or a more traditional relational DW or any combination of both.

Retrieve data from any point in the timeline

RETRIEVE DATA FROM ANY POINT IN THE TIMELINE

BryteFlow enables time series data so point-in-time analytics is a breeze. This versioning feature is invaluable for historical and predictive trend analysis.

SEPARATE COMPUTE AND STORAGE TO LOWER DATA COST

Pay only for data you use, when you compute. Unlike most Enterprise Analytics platforms, BryteFlow allows you to scale disk space and compute capacity independently, bringing down the cost of data considerably.

Infinifely scalable serverless architecture

NO CAPITAL INVESTMENT FOR EQUIPMENT OR THIRD PARTY TOOLS

BryteFlow builds an analytical environment where third party tools are not needed. It delivers near-infinite scale and eliminates user workload conflict by using serverless architectures and sharing nothing processing.

You take care of the insights. We'll take care of the data.

We believe every organisation should derive insights and profit from their data with smart analytics. We can help you ingest and access analytics-ready data in real-time. It will free you up to focus on what you do best - business, while we focus on what we do best - delivering your data to dashboard in minutes!

ABOUT US

Bryte is AWS Technology Partner of the Year 2018

At Bryte Systems we believe your data should deliver immediate business value. We provide enterprise software to build Cloud Data Lakes and Analytics environments to some of the biggest names in US and Australian business including Under Armour, Origin Energy, Citic Pacific Mining, ANZ Bank, Vocus Communications, Woodside Energy, Waterford and more.

We believe BrtyeFlow software for AWS / Azure is a smarter, more cost-effective alternative to the typical cloud data warehouse. Our mission is to take the pain out of data and enable it to add incredible value to your business. With BryteFlow you can replicate and prepare data for analytical and business insights in almost real- time across AI, ML, analytics and other hybrid environments.

CLIENTS

*A Partial Client List

If you need a Data Management solution for Analytics that can be implemented fast without disrupting regular business operations and starts delivering from Day One, BryteFlow is perfect for you. We can show you how fast it can unlock your data with a demo and a free trial.
